Briefing on China's Experience on COVID-19 Response

Dr. Ma Xiaowei

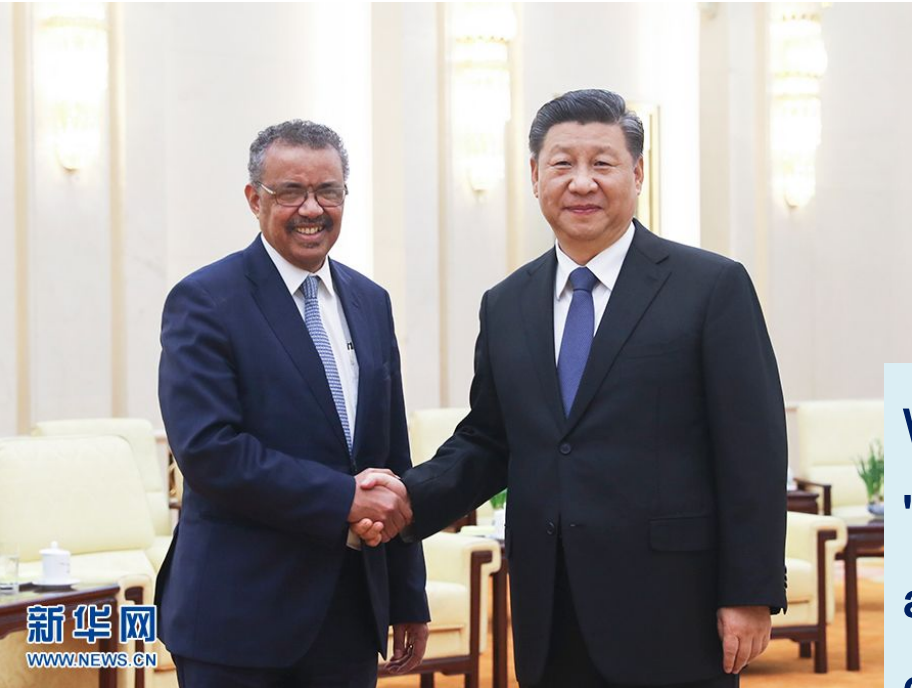

Minister, National Health Commission, China

March 27, 2020

中华人民共和国国家卫生健康委员会

National Health Commission of the People's Republic of China

WHO-China Joint Mission :

"China has rolled out perhaps the most ambitious, agile and aggressive disease containment effort in history. Within 7 weeks, the approach taken in China has averted or at least delayed hundreds of thousands of COVID-19 cases in the country and also played a significant role in creating a stronger first line of defense against international spread."

An Unified and Effective Commanding System

Four lines
of defense

1

The first line is to win the battle in Wuhan and Hubei against the epidemic.

2

The second line is to prevent a major outbreak in Beijing.

3

The third line is to stop the spread of the disease in Hubei's surrounding regions.

4

The fourth line is to resolutely contain the spread of the epidemic nationwide.

4-Early Measure

Early
Detection

Early
Reporting

Early
Isolation

Early
Treatment

Coordinated Deployment of Medical Resources

3 mobile P3 labs expanded the nucleic acid testing capacity to **35,000** persons/day

Tracing and strict quarantine of **close contacts**

16 makeshift hospitals treated more than mild and moderate **12,000** patients

Patient beds: from more than 5,000 to **23,000** in short term (**9,000** beds for severe patients)

Rapid Improvement in Treatment Capacity

340 medical teams, over **42,000** medical staff dispatched

Wide use of **Traditional Chinese Medicine**

Gathering Patients, Experts and Resources for better treatment outcome

Free Treatment for the infected

Application of High-tech Measures

Big data was applied to conduct epidemiological research, and close contact tracing

Identifying Pathogen in **8 days**

Optimizing Test kit in **16 days**

International exchange & cooperation

Strong Support for China from the International Community at the beginning

Sharing **information, genetic sequencing, probe and primer** in a timely manner with international communities

Providing 20 million USD to WHO to support COVID-19 SPRP

Sharing Protocols for the Prevention and Control, Diagnosis and Treatment

Technical exchanges with more than 100 countries.
